Summary and Objective

Software Engineer experienced in Golang, cloud-native development, and microservices. I develop distributed systems, work on improving database performance, and use Cloudflare and GRPC to enhance system efficiency, lower costs, and reduce API response times.

Experience

Product Manager & Software Engineer May 2025 – Present

Piovation GMBH *Munich, Germany (Remote)*

- Leading the development and roadmap execution of **PioWorkers**, a digital workers and cloud operations platform, coordinating cross-functional teams to deliver scalable and reliable automation solutions.
- Driving product decisions, requirement gathering, prioritization, and execution while actively contributing to backend architecture and software development.
- Designed and developed **Golang microservices** powering cloud infrastructure management, worker orchestration, scheduling, and operational automation workflows.
- Architected and optimized **Kubernetes-based** deployments, managing containerized workloads, pod lifecycle operations, resource allocation, and cluster reliability.
- Built and maintained **Docker-based** infrastructure solutions, improving deployment consistency, scalability, and operational efficiency across environments.
- Led technical problem-solving initiatives involving distributed systems, infrastructure orchestration, performance optimization, and cloud resource management.
- Mentored engineers, conducted architecture reviews and code reviews, and established engineering best practices to improve code quality and accelerate delivery.

Software Engineer January 2024 – May 2025

Rabbitloader (Yogi Network) *Kolkata, IN*

- Microservices Architecture: Created and executed the architecture of independently deployable services interacting through REST and **RabbitMQ** using **Golang** which increased system scalability, maintainability, and testability by **unit testing in linux environment**.
- Golang Optimization: Developed concurrent microservices using **goroutines** and **channels**, reducing CPU utilization by optimizing blocking operations, and achieving a 40% throughput improvement.
- Distributed Systems: Designed and developed event-driven pipelines using **RabbitMQ**, worker pools, and concurrent consumers to ensure fault tolerance and high performance under heavy load.
- Cloud Integration: Collaborated on **Cloudflare-Vector AI** training development in **cf-worker(node-js environment)** and integrated it with **WordPress CMS** using cloud automation tools, improving scalability and efficiency and resulting in the decrease of bounce rate by 30 percent.
- Architected an SEO-optimized **(Dofollo)** web application using React + TypeScript, deployed on **Cloudflare Workers** with **D1 (SQLite)** for edge-side storage and **MongoDB** in a supporting microservice for high-performance data access, resulting in a 10% reduction in hosting costs and improved SEO rankings.
- Software Engineering: Streamlined software development by implementing data serialization with **Protocol Buffers**(GRPC), reducing latency by 30 ms per transaction during peak usage.

Software Engineer Intern August. 2022 – January 2024

Rabbitloader (Yogi Network) *Remote, IN*

- Microservices Development: Spearheaded the design of microservices in **Golang** for RabbitLoader, achieving a 100-page speed score and improved system efficiency through **RabbitMQ** for asynchronous communication along with **Firebase Authentication** integration.
- Cloud Systems: Built and managed high-traffic services hosted on DigitalOcean and **Cloudflare**, with an average of 60,000 daily interactions.
- Database Optimization: Utilized **MongoDB**, **MySQL** and caching tools (**Redis, BigCache, and Memcache**) to achieve sub-second response times, reducing query latency by 40% and improving system throughput by 25% in real-time systems.

Full Stack Developer Intern May 2022 – July 2022
Wizwack *Remote, IN*

- Cloud Services: Developed backend services using **Firebase (Pub/Sub)** on **Google Cloud Platform (GCP)** to support multiplayer gaming for 100+ simultaneous users using **Node-js** and **Express.js**.
- API Design and Optimization: Designed and exposed **REST APIs** with 1/2s response times, enhancing user experiences.
- Automated bulk testing for APIs using Postman, ensuring reliable communication between **cloud services**.

Technical Skills

Languages: **Golang (goroutines, channels, Gin, Testify),** JavaScript**, TypeScript,** SQL, Java
Backend: **Node.js**, Gin, GRPC (Protobuf, Stream), Cloudflare Workers, REST APIs , **GCP**
Frontend: React.js, Material-UI
Databases: **MongoDB, MySql**, PostgreSQL, **FireStore**, Cloudflare D1
Devops and Cloud: **Docker, Cloudflare, Firebase, Kafka, RabbitMQ**
Tools: Git, VS Code, **Jira**
Core-Concepts: **Algorithms Design**, Linux/Unix, High-performance Distributed Systems, Computer Networking
Soft Skills : Strong communication, effective collaboration, problem solving, system thinking, and team-oriented.

Education

I.K. Gujral Punjab Technical University Jalandhar, India
Bachelor of Technology in Computer Science: ***8.83*** *Average Sgpa* *Oct 2020 – June 2024*

Projects

LinkedIn-Go Pkg | *Golang — Github* 2023

- Built a production-ready **Golang SDK** for LinkedIn API, ensuring a 30 percent faster authentication process via optimized OAuth2 handling
- Optimized token exchange mechanism, reducing authentication failures from 50 to 20 percent, ensuring seamless API access.
- Designed a LinkedIn posting feature, reducing manual effort by 80 percent through automation.

Html-Optimizer | *G*olang, go-doc, Microservice, Docker 2023

- Engineered an independent module in Go that optimized HTML documents, resulting in a 40 percent reduction in page load times and enhancing user engagement across web applications by improving overall performance efficiency.
- Optimized HTML documents, cutting 40 percent page load times, improving Core Web Vitals scores, and boosting SEO performance.

Achievements

- **GATE 2023 Qualified** — IIT Kharagpur
- **CodeChef Contest Rank-6** — CodeChef
- **Department Coding Contest Winner** — I.K. Gujral Punjab Technical University, CSE Department

Coding Profiles

- **LeetCode** — *usutk*
- **CodeChef** — *utk2003*
- **Geeks For Geeks** — utkarshsaxena2012
- **InterviewBit** — utkarsh-saxena844
- **Unstop** — utkarssax7695

Interest

- **NBA**
- **Music Production**
